

#### Safety Data Sheet

In accordance with CFR 1910.1200 (OSHA HCS)

SDS No. 150

Date of review: June 2, 2015

Product name:

Arsenic (III) oxide

Product code:

11471, 11608, 17523, 18864, 90916 Research and product development

Relevant use and restrictions on use: Manufacturer/Supplier:

Noah Technologies Corporation

1 Noah Park

San Antonio, Texas 78249-3419 Phone: 210-691-2000

Fax: 210-691-2600

Emergency information:

Web site: www.noahtech.com

CHEMTREC 800-424-9300

**Emergency Overview:** 

Signal word(s):

Dang

Pictogram(s):

Skull and crossbones Health hazard

Corrosion Environment

Hazard statements:

Precautionary statements:

H300 Fatal if swallowed

H314 Causes severe skin burns and eye damage

H318 Causes serious eye damage

H350 May cause cancer

H410 Very toxic to aquatic life with long lasting effects

P260 Do not breathe dust or mist

P264 Wash skin thoroughly after handling

P270 Do not eat, drink or smoke when using this product

P273 Avoid release to the environment

P280 Wear protective gloves/protective clothing/eye protection/face protection

0

P301/310/330 IF SWALLOWED: Immediately call a POISON CENTER or doctor/physician. Rinse mouth. P303/361/353 IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower. P304/340/310 IF INHALED: Remove person to fresh air and keep comfortable for breathing. Immediately call a

POISON CENTER or doctor/physician

P305/351/338/310 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or doctor/physician.

Hazards not otherwise classified:

Ingredients of unknown acute toxicity:

GHS Classification:

None None

> Acute toxicity, Oral - 2 Skin corrosion - 1B

Serious eye damage - 1 Carcinogenicity - 1A Acute aquatic toxicity - 1 Chronic aquatic toxicity - 1

HMIS ratings (scale 0-4):

Health hazard: 3\* Flammability: 0

Physical hazard:

Chemical name:

Designation:

Arsenic (III) oxide

CAS number:

1327-53-3 215-481-4 As<sub>2</sub>O<sub>3</sub>

Formula: Synonyms:

Arsenic trioxide, arsenious acid

Ingredients of known acute toxicity:

Arsenic (III) oxide

After inhalation:

Move person into fresh air. If not breathing, give artificial respiration. Consult a physician.

After skin contact: Take off contaminated clothing and shoes immediately. Wash off with soap and plenty of water. Take victim

immediately to hospital. Consult a physician.

After eye contact:

Rinse thoroughly with plenty of water for at least 15 minutes and consult a physician. Continue rinsing eyes

during transport to hospital.

After ingestion:

Do NOT induce vomiting. Never give anything by mouth to an unconscious person. Rinse mouth with water.

Consult a physician.

Information for doctor:

Show this safety data sheet to the doctor in attendance

Symptoms/effects; acute and delayed:

Ingestion results in marked irritation of the stomach and intestines with nausea, vomiting, and diarrhea. In severe cases, the vomitus and stools are bloody and the patient goes into collapse and shock with weak, rapid pulse, cold sweats, coma and death. Chronic poisoning may manifest itself in different ways. There may be disturbances of the digestive system such as cramps, nausea, constipation, or diarrhea. Liver damage may

occur. Disturbances of the blood, kidneys and nervous system may occur.

Immediate medical attention and special

treatment needed:

See above

Suitable and unsuitable extinguishing agents:

Water spray, alcohol-resistant foam, dry chemical or carbon dioxide

Special hazards caused by the material, its products of combustion or resulting gases:

Oxides of arsenic

Special fire fighting procedures:

Wear self-contained breathing apparatus and fully protective fire fighting equipment/clothing

Unusual fire and explosion hazard: No available data

Person-related safety precautions:

Wear respiratory protection, Avoid dust formation, Avoid breathing vapours, mist or gas, Ensure adequate

ventilation.

Measures for environmental protection:

Prevent further leakage or spillage if safe to do so. Do not let product enter drains. Discharge into the

environment must be avoided.

Measures for cleaning/collecting:

Pick up and arrange disposal without creating dust. Sweep up and shovel. Keep in suitable, closed

containers for proper disposal.

Additional information:

See Section 7 for information on safe handling

See Section 8 for information on personal protective equipment

See Section 13 for information on disposal See Section 15 for regulatory information

7 Handling and storage

Information for safe handling:

Information about protection against

Avoid contact with skin and eyes. Avoid dust formation. Provide appropriate exhaust ventilation.

explosions and fires:

Storage requirements to be met by storerooms

and containers:

Further information about storage conditions:

Incompatibility (avoid contact with):

Keep container tightly closed in a dry and well-ventilated place

Strong acids and oxidizers. Reacts rigorously with rubidium carbide, chlorine trifluoride, fluorine, mercury,

sodium chlorate, tannic acid, inter-halogens May decompose on exposure to moist air or water

No data available

8 Exposure controls/personal protection Local exhaust, chemical fume hood

Ventilation requirements:

Additional information:

Components with exposure limits that require

monitoring:

OSHA PEL: TWA 0.01 mg(As)/m3

ACGIH TLV: TWA 0.01 mg(As)/m3; Target organs; liver, kidneys, skin, CNS, respiratory system, lungs

No additional data available

General protective and hygienic measures:

The usual precautionary measures for handling chemicals should be adhered to

Keep away from foodstuffs, beverages and food Instantly remove any soiled and impregnated garments Wash hands during breaks and at the end of the work

Avoid contact with the eyes and skin

Personal protective equipment:

Respiratory protection:

Precautionary labeling:

Filter-dust, fume, mist; respirator equipped with HEPA

(Use only NIOSH or CEN approved Equipment)

Hand protection:

Handle with gloves, Gloves must be inspected prior to use. Use proper glove removal technique.

Eye protection: Safety glasses, goggles

Skin protection: Completely covering work attire with full length apron

Additional protective equipment: Sufficient to prevent contact. Emergency eyewash and safety shower

Wash thoroughly after handling

Do not get in eyes, on skin or on clothing Do not breathe dust, vapor, mist, gas Keep away from heat, sparks, and open flames

Empty container may contain hazardous residues

Physical state: Powder Color:

White to off-white Odor: Odorless Odor threshold: Not determined

Molecular Weight (Calculated): 197 84

Not determined Melting point/freezing point/range: 312.3 C Boiling point/range: 457.2 C Sublimation temperature/start: Not determined Not determined Decomposition temperature:

Flammability (solid, gas): Not determined Flash point: Not determined Autoignition temperature: Not determined Danger of explosion: Not determined

Flammable limits:

Not determined Upper: Not determined **Evaporation Rate:** Not determined

Vapor pressure (mm Hg): 0.000001 mm Hg @ 66 C

Vapor density: Not determined Specific gravity: 3.738 **Bulk density:** Not determined

Solubility in/Miscibility with water: 37 g/L @ 20 C Partition coefficient n-octanol/water: log Pow: 5 Viscosity: Not determined Other information: Not determined

10 Stability and mactivity

Reactivity: Not determined

Chemical stability: Stable under recommended storage conditions

Possibility of hazardous reactions: Not determined

Conditions to be avoided: Heat, contact with incompatibles

Materials to be avoided: See section 7 for information on proper handling and storage

Dangerous reactions: Reacts rigorously with rubidium carbide, chlorine trifluoride, fluorine, mercury, sodium chlorate, tannic acid,

inter-halogens

Hazardous decomposition products: Oxides of arsenic

(thermal and other)

11 Toxicological Information

LD/LC50 values that are relevant for

classification:

oral-rat LD<sub>50</sub>: 14.6 mg/kg Irritation or corrosion of skin: No data available Irritation or corrosion of eyes: No data available

Primary irritant or corrosive effect:

on the skin: Causes severe skin burns on the eve: Causes serious eye damage Sensitization: No data available

Potential health effects:

Inhalation: May cause serious respiratory tract damage Ingestion: Severe irritation of the stomach and intestines

Skin: Severe skin burns Eves: Serious eye damage

Signs and symptoms of exposure: Ingestion results in marked irritation of the stomach and intestines with nausea, vomiting, and diarrhea. In

severe cases, the vomitus and stools are bloody and the patient goes into collapse and shock with weak, rapid pulse, cold sweats, coma and death. Chronic poisoning may manifest itself in different ways. There may be disturbances of the digestive system such as cramps, nausea, constipation, or diarrhea. Liver damage may

occur. Disturbances of the blood, kidneys and nervous system may occur.

To the best of our knowledge the acute and chronic toxicity of this substance is not fully known

Carcinogenicity: EPA-A: Human carcinogen: sufficient evidence from epidemiologic studies

> IARC-1: Carcinogenic to humans: sufficient evidence of carcinogenicity NTP-1: Known to be carcinogenic: sufficient evidence from human studies

Carcinogen as defined by OSHA

ACGIH-A1: Confirmed human carcinogen: Agent is carcinogenic to humans based on epidemiologic studies RTECS contains tumorigenic and/or carcinogenic and/or neoplastic data for components in this product

Toxicity:

Toxicity to algae:

Additional information:

Toxicity to fish: Rainbow trout LC50: 21,000 ug/L:96H

Toxicity to daphnia and other aquatic invertebrates:

Daphnia magna EC50: 8.23 mg/L:24H

Persistence and degradability:

No data available

Biodegradability:

No data available

Bioaccumulative potential:

Unclean packagings recommendation:

Bioaccumulation:

Bioconcentration factor (BCF): 236

Mobility in soil: No data available

Other adverse effects:

Very toxic to aquatic life with long lasting effects

13 Dispressi considerations Recommendation:

Consult state, local or national regulation for proper disposal Allow professional disposal company to handle waste

Must be specially treated under adherence to official regulations

Disposal must be made according to official regulations

Ship From: 3000 - Castle Hayne NC, 28429. US Our Order: 559048 SO

Quantity Shipped: 360.000 Lot Number: 3000QXDK0101 Ship Date: 3 OCT 2014 EA

Date Mfg: 1 OCT 2014

<u>Test</u> Sodium dichromate dihydrate	Result 100.62	<u>UOM</u> %
Sodium Sulfate	0.14	%
% Sulphate	0.10	%
Sodium Chloride	0.006	%
Chloride	0.004	%
Vanadium Pentoxide	0.004	%
Vanadium	0.002	%
CrO3 (Equivalent)	67.53	%
Water of Hydration	11.50	%

Appearance: Orange—Red Crystals pH is not measured but is approximately 4.0 in a 1.5% solution.

Vanadium (V), Vanadium Oxide (V205), Sodium Chloride (NaCl), Chloride(Cl)are typical analyses. CrO3 is calculated from the assay and is on this equivalent basis even though it is not present in crystal in this form.

H2O is contained in the crystal structure as water of hydration and is not free moisture.

Meets GSA Commercial Item Description A-A-59123 [formely Federal Spec O-S-595b(1)].

#### VII. HEALTH HAZARD DATA

#### PRINCIPAL ROUTS OF ABSORPTION: inhalation and Ingestion

EFFECTS OF OVEREXPOSURE: Metal fumes and /or fluoride containing vapors from firing may cause lung inflammation and injury terms of hours with symptoms of chest pains, chills, cough, headache and diarrhea.

Prolonged contact with the dust can be very irritating to the eyes and/or skin. High dust levels can be irritating to the respiratory tract. Excessive inhalation of crystalline silica containing dust over many years can result in silicosis, a disabling lung disease.

With adequate ventilation, dust control and good personal hygiene, symptoms of overexposure should not occur. Advise regular medical modificing of employees by a physician competent in industrial health.

CARCINOGENICITY: In IARC has determined that crystalline silica from occupational exposure is in Group 1. "sufficient evidence in humans for carcinogenicity".

OTHER HEALTH INFORMATION: This product contains crystalline silica, a chemical known to the State of California to cause cancer.

EMERGENCY AND FIRST AID PROCEDURES: If overexposure is suspected move employee to fresh air; if breathing is difficult give oxygen. Call a physician. For dust in ayes, flush immediately with clean water and call a physician.

SOURCE OF HEALTH HAZARD DATA: this MSDS was developed from information on the constituent substances of this frit mixture, not from test data on the frit mixture itself.

#### VIII. PRECAUTIONS FOR SAFE HANDLING AND USE

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: Uncontaminated material may be recovered and re-used. If contaminated scoop, vacuum or wash into receptacle for disposal.

WASTE DISPOSAL METHOD: Barium is listed in US-EPA Code of Federal Regulation 40, part 261.24.b Testing of the waste may be required to determine status under hazardous waste regulations.

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING: Protect containers against physical damage, store in dry area away from feed and food products.

OTHER PRECAUTIONS: Employees should wash and change into clean clothes before going home.

#### IX. CONTROL MEASURES

RESPIRATORY PROTECTION: (Specify type) Use a NIOSH approved dust and/or fume respirator as necessary.

VENTILATION: Recommended for dust control, vent dust to collector.

PROTECTIVE GLOVES: Use judgement - cotton gloves recommended.

EYE PROTECTION: Use judgement - safety glasses recommended

OTHER PROTECTIVE CLOTHING OR EQUIPMENT: Wear appropriate clean, protective clothing such as, but not limited to, coveralls, smocks, aprons, gloves, shoes and hats

WORK/HYGIENIC FRACTICES: Food, beverages and smoking materials should NOT be in the work area. Hygiene is very important, employees should wash thoroughly before eating, drinking, smoking or applying.

Judgements as to suitability of information berein or the purchaser's purposes are necessarily the purchaser's responsibility. Reasonable care has been taken in the preparation of this information, but FERRO EXTENDS NO WARRANTIES, MAKES NO REPRESENTATIONS AND ASSUMES NO RESPONSIBILITY AS TO THE ACCURACY OR SUITABILITY OF THIS INFORMATION FOR ANY PURCHASER'S USE OR FOR ANY CONSEQUENCE OF ITS USE.

## Typical glaze frit composition for FM-3403

Oxides	New FM-3403	Original Ferro 3403
Na2O	0.31%	0.31%
K2O	0.86%	1.48%
PbO	67.90%	67.78%
AL2O3	1.59%	2.31%
SiO2	29.24%	28.05%
CaO	0	0.07%
Coeff of Exp	N/A	7.18 10x(-6)
Fusion Temp °F	1350	1350
Flow Temp °F	1450	1450
